DIIPESSH MISTRY

Calgary, Alberta, Canada diipessh@gmail.com 306-450-0421 in/diipessh

SUMMARY

Information security specialist passionate about aligning security architecture plans and processes with security standards and business goals. Extensive experience developing and testing security frameworks for cloud-based infrastructure as a subject matter expert in vulnerability management. Versed in robust network protections.

EXPERIENCE

Technology Lead - Security **Jan 2025 - Present [Remote]**
Infosys Public Services

- Ensure the protection of critical web assets for the Govt of Canada and secure against every possible attempt at unauthorized access
- Harden the current security posture of the cloud where the client has hosted their most critical systems
- Designed phishing & vishing campaigns and built risk management dashboards with tracked metrics and an executive presentations for the results and strategy effectiveness
- Conduct vulnerability scans and run phishing and security awareness campaigns to ensure stakeholders are up to date with the latest threats in the cyber world
- Ensure the compliance standards are intact and the environment is immune to any misconfiguration that can void cloud compliance standards per industry best practices
- Analyze the Microsoft Sentinel logs to affirm that client assets are protected against bot attacks, malicious web crawlers and bad actors
- Malware sample analysis and reporting to keep clients up-to-date on any malicious phishing attempts, DLP and any service outage caused by any insecure system or misconfigurations

Senior Security Administrator **Nov 2024 - Jan 2025 [Remote]**
Geotab Inc

- Maintain overall security of the Geotab network for all servers, network peripherals, and workstations.
- Collaborate with the rest of the internal security teams to plan and implement Geotab security policies.
- Oversee the deployment, configuration, and maintenance of advanced security tools and solutions (e.g., intrusion detection, firewalls, endpoint protection).
- Lead vulnerability scanning efforts, manage threat detection systems, and ensure timely remediation of security risks.
- Develop and automate security audits, patch management, and system hardening processes to ensure optimal security postures.
- Collaborate with development and operations teams to integrate security protocols into CI/CD pipelines.
- Conduct security assessments and penetration testing and implement security controls for cloud environments (e.g., AWS, GCP).

Security System Administrator
Geotab Inc **May 2019 - Oct 2024, [Remote]**

- Maintain overall security of the Geotab network for all virtual servers, network peripherals, and workstation assets, and schedule vulnerability scanning, automating repetitive tasks with Linux bash for Tenable I/O and Google Cloud firewall using secure API integration.
- Configured and applied permissions on Google Cloud Platform, Identity and Access Management, Role-Based Access Control, Cloud Firewall, and Service Account Management—Roles & Permissions.
- Designed and developed scripts for repetitive vulnerability scanning and reporting, firewall rule configuration, and management of all assets using Nessus on Tenable.io and Qualys.
- Conduct a security impact analysis on any new change submitted to analyze beforehand to sense any security impacts on the existing systems or future enhancements.
- Collaborate with the SOC team to plan and implement Geotab security policies and test, and roll out new security systems such as RBAC, IAM etc.
- Automate repetitive tasks with appropriate scripting languages/tools (PowerShell, Bash), and configure and manage service accounts in the Google Cloud Platform and on the in-house developed portal to provision roles & permissions based on Role Based Access Control.

- Administer and deploy various security systems such as Crowdstrike Falcon agents, Tenable Nessus agents, DUO for MFA, Splunk for SIEM solutions, and Zscaler

Cyber Security Specialist - ICS

BBA Engineering Ltd **November 2019–April 2020, Calgary, AB**

- Design site assessment methodologies to be aware of risk exposures, vulnerabilities, and threat vectors of industrial control systems for clients.
- Compliance-ready consulting reports as per the client's requirements and needs for their instrument and control safety systems.
- Developed & designed templates for security posture assessments and draft reports.
- Managed patch management procedures to ensure timely updates and mitigate vulnerabilities.
- Enhanced network security by implementing advanced threat detection and prevention tools.

Security Operations Center Analyst

Uzado Inc., **March 2019 - May 2019, Vaughan, ON**

- Conducted vulnerability assessment, remediation, and compliance management using Qualys.
- Analyzed security events in SIEM to review network traffic and host-based security appliance logs.
- Presented accurate, data-driven recommendations to stakeholders to assist in decision-making processes.

Senior Systems Analyst

WBM Technologies Inc. **March 2016 - August 2018, Calgary, AB**

- Resolved escalated issues and monitored security trends related to business systems and infrastructure.
- Operational experience with security controls on firewall IDS/IPS;
- Resolved critical and urgent issues while working as a data center technician.
- Streamlined processes for improved productivity through thorough systems analysis and optimization.

Team Lead

WBM Technologies Inc. **June 2015 - February 2016, Regina, SK**

- Responsible for timely deployments for the Govt. of Saskatchewan Next Generation Desktop and MDM (Mobile) Device Management solution for government executives, including post-deployment remedies.
- Led the team of deployment technicians and managed province-wide operations successfully.
- Management of deployment incident response to include documentation, staff training, mock exercises, and resource coordination during the deployment of new systems and support services.

EDUCATION

Master of Engineering in Computer Networks

Ryerson University • Toronto, ON • Oct 2019

Post-graduation in Information Technology Professionals

Lambton College of Arts and Technology • Sarnia, ON • Dec 2011

Bachelor of Technology in Computer Engineering

Ganpat University • Gujarat, IN • Aug 2009

CERTIFICATIONS

CISSP - Certified Information Systems Security Professional
CCNA Routing & Switching
MCSA - Microsoft Certified Server Administrator
CompTIA Network+, Project+ +

SKILLS

Virtualization: VirtualBox, Hyper-V, VMware vSphere, Citrix, Dell EqualLogic SAN
Cloud Platforms: Google Cloud Platform, Microsoft Azure, AWS
SIEM: Splunk, AlienVault, Microsoft Azure Sentinel
Vulnerability Management: Qualys, Tenable, Aqua, NetSparker, Nessus Manager
Tools: phishing, vishing, smishing Knowb4,
Endpoint protection—CrowdStrike Falcon Agents, Zscaler McAfee endpoint protection
Human Risk Management: Security Training & Awareness program,
